5.0 out of 5 stars Amazing laptop

Reviewed in the United States on August 22, 2022

Color: SilverCapacity: 512GB**Verified Purchase**

Love how slim and light weight this is. If you own an iPhone the integration is perfect. You can manage your messages, calls, & emails on this device. Everything syncs up beautifully! The device is very fast and I upgraded to the 512gb SSD. You get the dual 35w charger with this and it charged mine from 50% to full in less than 45 mins while using it. The magnet charging cable is braided and color coded with a light indicator while charging. I am shocked how fast this machine moves and what quality the hidden speakers are. Phone calls and FaceTime are flawless. The new web cam is a welcome upgrade and the notch for it is subtle. The trackpad and keyboard are top notch and respond perfectly. This is worth every penny. I went with silver since that new midnight color is prone to scuffs and scratches showing. No fingerprints show on this silver and it's a very classic look. If you're on the fence go for it. You won't be disappointed. No more windows stuff for me.

5.0 out of 5 stars Great little laptop

Reviewed in the United States on July 29, 2023

Color: MidnightCapacity: 512GB**Verified Purchase**

This was just what I was hoping it would be. It's easy to toss around in my backpack. It's fast and has wonderful graphics. I retired recently but still need a laptop and this does just about everything. I can even charge it on the same C cable I use for everything else although it does have a magnetic charging cable as well. I bought a 100 watt charging block with ports for everything and with that and whatever other electronics I need I still have a light backpack. It's heavier than previous models but it's put together better too, not to mention I got the upgraded memory as well. Great Apple product as usual.

5.0 out of 5 stars Great for school

Reviewed in the United States on July 19, 2023

Color: Space GrayCapacity: 512GB**Verified Purchase**

This computer is great for people in collage or high school. Its light weight allows it to be moved around to many places, which allows me to easily bring it to my friends place to work on projects with them. And if you are doing simple things like scrolling the web or chatting with friends on a service like discord, then the battery life lasts a very long time. But the front facing camera isn't really up-to-par with the modern standards today. So if you plan to use this for zoom, or google meet you may want to consider a webcam if you really care about the camera quality. The screen quality is nice, the colors are vibrant and it can get really bright too. If you have an iPhone there are many useful features that connect the phone with the computer. Airdrop is nice when sending research links from my phone to my computer for school slideshows, it is fast and easy. Also, I can send messages to all of my friends from my Mac, and all of my contacts and notes are synced from my phone to my Mac too. But if you do not have an iPhone, I may consider a different brand because the Mac isnt good with all of the Apple features like iCloud, and it would be a waste of money.

5.0 out of 5 stars Dont know why I waited so long to purchase this amazing laptop

Reviewed in the United States on July 17, 2023

Color: Space GrayCapacity: 256GB**Verified Purchase**

Purchased this on sale to replace a 11+ year old OG 15 inch Macbook Pro Retina, which still works perfectly despite the battery not holding a charge long. I tend to keep laptops for a long time and wanted to stay with Apple due to my experience with my last one. I waited on the M2 version for its upgrades over the M1, which I read is also a great computer. Love how fast it is, very snappy, and the specs are perfect for my heavy home office use. Setup was a breeze from an iCloud backup. Have used it on multiple Zoom and Teams video meetings and the new camera and speakers work awesome for this purpose. Hope this one lasts as long as the Mac Pro!

4.0 out of 5 stars Great for mobile computing

Reviewed in the United States on October 24, 2022

Color: Space GrayCapacity: 256GB**Verified Purchase**

I purchased this base model Macbook Air M2 for attending online courses through a university. I've been mainly a Windows PC user for a while now. My last Macbook was an old 12-inch Macbook Pro G4 (remember those mini-me/Yow Ming commercials?).

After being able to use this laptop for a couple of months, I've decided that given the current state of technology within my home, my future personal computers will most likely be all Apple, as long as I continue to use iPhones, AppleTVs and Apple Accessories (such as AirPods). The current form of the MacOS allows easy use of printers/scanners and any other computer peripheral you may need.

With all that said, I will say that you should consider this base model for the following reasons:

- You currently have an Apple ecosystem.
- You need a lightweight, small form-factor laptop for basic computing needs.
- You primarily run cloud-based platforms that don't require local storage.
- You'd like to work "unplugged" for many hours without having to charge the laptop.
- You enjoy a bright monitor and a pretty decent keyboard to type on.

At the same time, I would NOT recommend this model if you need the following:

- You'll be running large programs that require a lot of local storage.
- You require a machine that will process/render high-resolution media. The lack of a fan will cause the Macbook to thermal throttle, lowering your performance. For a little more, you're better off going with the base model Macbook Pro.
- Gaming (Thermal throttle will lower framerates).

A few honorable mentions:

- Despite the lack of larger, more visible speakers, the sound is decent for this category of laptop.
- The low power requirements make this an easy travel laptop, not requiring that you bring a huge brick to keep this thing going.
- The redesigned look is a lot nicer than the previous generation (I'm glad the wedge design is gone).

Finally, regarding value:

Considering where we are in tech today, I feel that for the money, we should no longer have base models with only 8GB of RAM and 256GB of SSD space. At the very least, I really hope that Apple would consider making their base models start at 16GB of Ram and 512GB of SSD storage without increasing the price. At the very least, if they keep the 256GB of SSD, give the option to keep an SD card on board without having to attach an external drive every time you want expanded storage.

5.0 out of 5 stars **Fast. Solid build.**

Reviewed in Canada on November 27, 2023

Color: MidnightCapacity: 256GB**Verified Purchase**

- Surprisingly fast. Three times faster (single core, using Geekbench 6) vs early 2015 MacBook Pro 13" after upgrading the MBP with a fast SSD.
- Quiet. And keyboard have sufficient depth to type. And screen is crisp. Will be great for typing, research, excel and other productivity work (though an external monitor would be the right place for excel).
- Trackpad seems to work as intuitively as the 2015 MBP 13.
- AAA games according to YT give 30-45 fps. I expect it should be fun to play older games if it's your only computer.
- Midnight looks great. A nice change from the usual silver. Im avoiding the case route and picking up a non magnetic sleeve to protect it. I expect scratches and dents over its lifetime. Not a big deal.
- In one day, there are hardly any fingerprints on it, and they don't bother me. I ask, are you typing on your laptop, or juggling it?

5.0 out of 5 stars **Amazing.**

Reviewed in Canada on November 28, 2023

Color: Space GrayCapacity: 256GB**Verified Purchase**

Amazing.

Battery ☒ - I travel for work a lot. The battery last for over a week without charging for emails, making docs, casual internet browsing, etc. For heavy processing like creating content, decent enough to last for atleast 5 hours.

No fan noise ☒ - no fan, so no noise! 😊 Im not a heavy user so this is perfect for me.

Light! ✍️ ☒ - I mean, it should be cos its "air". Kidding aside I prefer this more than an ipad pro + keyboard set up.

Still getting used to it. - I transitioned from using windows for more than 20 years to using macbook just a couple of months ago. I thought it will be difficult but it isn't. Needs a lot of getting used to, but the regular use of this surely helped a lot in the process.

I am an Apple fan. I have a MacBook Pro but I was looking for something a little bit lighter. Love it! Light weight, fast and similar to my other Mac.

Apple macbook air M2 2022 Specifications:

Finish

- Silver
- Starlight
- Space Gray
- Midnight

Chip

Apple M2 chip

- 8-core CPU with 4 performance cores and 4 efficiency cores
- 8-core GPU
- 16-core Neural Engine
- 100GB/s memory bandwidth

Configurable to M2 with 8-core CPU and 10-core GPU

Media engine

- Hardware-accelerated H.264, HEVC, ProRes, and ProRes RAW
- Video decode engine
- Video encode engine
- ProRes encode and decode engine

Display

Liquid Retina display

- 13.6-inch (diagonal) LED-backlit display with IPS technology;¹ 2560-by-1664 native resolution at 224 pixels per inch with support for 1 billion colors
- 500 nits brightness

Color

- Support for 1 billion colors
- Wide color (P3)
- True Tone technology

Battery and Power²

- Up to 18 hours Apple TV app movie playback
- Up to 15 hours wireless web
- 52.6-watt-hour lithium-polymer battery
- 30W USB-C Power Adapter (included with M2 with 8-core GPU)
- 35W Dual USB-C Port Compact Power Adapter (included with M2 with 10-core GPU and 512GB storage, configurable with M2 with 8-core GPU)
- USB-C to MagSafe 3 Cable
- Fast-charge capable with 70W USB-C Power Adapter

Charging and Expansion

- MagSafe 3 charging port
- 3.5 mm headphone jack
- Two Thunderbolt / USB 4 ports with support for:
 - Charging
 - DisplayPort
 - Thunderbolt 3 (up to 40Gb/s)
 - USB 4 (up to 40Gb/s)
 - USB 3.1 Gen 2 (up to 10Gb/s)

Memory

- 8GB unified memory
Configurable to 16GB or 24GB

Storage³

- 256GB SSD
Configurable to 512GB, 1TB, or 2TB

Keyboard and Trackpad

Backlit Magic Keyboard with:

- 78 (U.S.) or 79 (ISO) keys including 12 full-height function keys and 4 arrow keys in an inverted-T arrangement
- Touch ID
- Ambient light sensor
- Force Touch trackpad for precise cursor control and pressure-sensing capabilities; enables Force clicks, accelerators, pressure-sensitive drawing, and Multi-Touch gestures

Wireless

Wi-Fi

- Wi-Fi 6 (802.11ax)

Bluetooth

- Bluetooth 5.3

Camera

- 1080p FaceTime HD camera
- Advanced image signal processor with computational video

Audio

- Four-speaker sound system
- Wide stereo sound
- Support for Spatial Audio when playing music or video with Dolby Atmos on built-in speakers
- Spatial Audio with dynamic head tracking when using AirPods (3rd generation), AirPods Pro, and AirPods Max
- Three-mic array with directional beamforming
- 3.5 mm headphone jack with advanced support for high-impedance headphones

Display Support

Simultaneously supports full native resolution on the built-in display at 1 billion colors and:

- One external display with up to 6K resolution at 60Hz

Thunderbolt 3 digital video output

- Native DisplayPort output over USB-C
- VGA, HDMI, DVI, and Thunderbolt 2 output supported using adapters (sold separately)

Video Playback

- Supported formats include HEVC, H.264, and ProRes
- HDR with Dolby Vision, HDR10, and HLG

Audio Playback

- Supported formats include AAC, MP3, Apple Lossless, FLAC, Dolby Digital, Dolby Digital Plus, and Dolby Atmos

Operating Requirements

- Line voltage: 100V to 240V AC
- Frequency: 50Hz to 60Hz
- Operating temperature: 50° to 95° F (10° to 35° C)
- Storage temperature: -13° to 113° F (-25° to 45° C)
- Relative humidity: 0% to 90% noncondensing
- Operating altitude: tested up to 10,000 feet
- Maximum storage altitude: 15,000 feet
- Maximum shipping altitude: 35,000 feet

Size and Weight

- Height: 0.44 inch (1.13 cm)
- Width: 11.97 inches (30.41 cm)
- Depth: 8.46 inches (21.5 cm)
- Weight: 2.7 pounds (1.24 kg)⁴

Operating System

macOS

macOS is the most advanced desktop operating system in the world. And with macOS Sonoma, work and play on your Mac are even more powerful — with new ways to elevate your video presentations, boost your gaming performance, and personalize your device.
